

**Before** following these Windows 8 instructions, please ensure your computer has CaddieSync Express installed with the required "**SG3/SG4**" install option before continuing. You can use the "**Sync**" button in the top right hand corner to ensure CaddieSync Express is installed and up-to-date.

## **SG3/SG4 & Windows 8.1: Installing Unsigned Drivers**

*(You can view the version of your Windows 8 OS by holding down the "Windows Key" and pressing the "X" key on your keyboard, then selecting "System" in the Quick Link Menu)*

If you own a SkyCaddie SG3 or SkyCaddie SG4 and you run the new Windows 8 operating system, you will need to install an unsigned driver to sync your device with CaddieSync Express. This SkyCaddie unsigned driver is safe to install; it has been thoroughly tested.

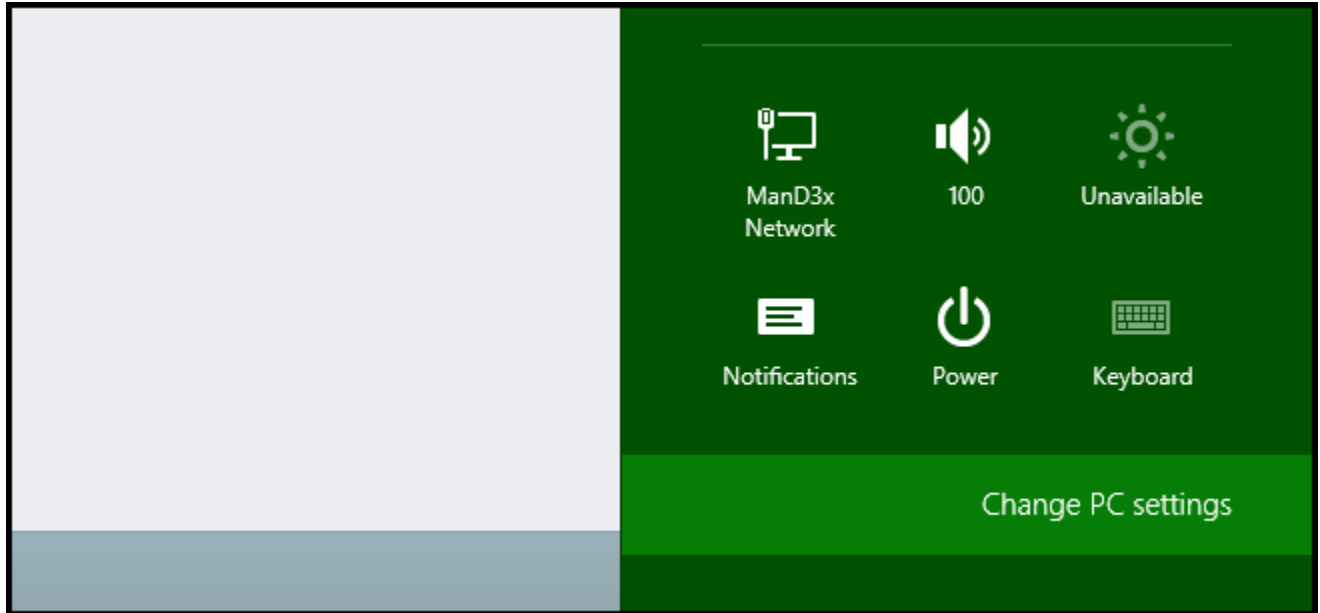

There are two general steps to successfully install an unsigned driver with Windows 8: (1) momentarily disabling the signature enforcement, and (2) manually installing the unsigned driver. You may want to print this FAQ.

### **Part 1: To momentarily disable the signature enforcement**

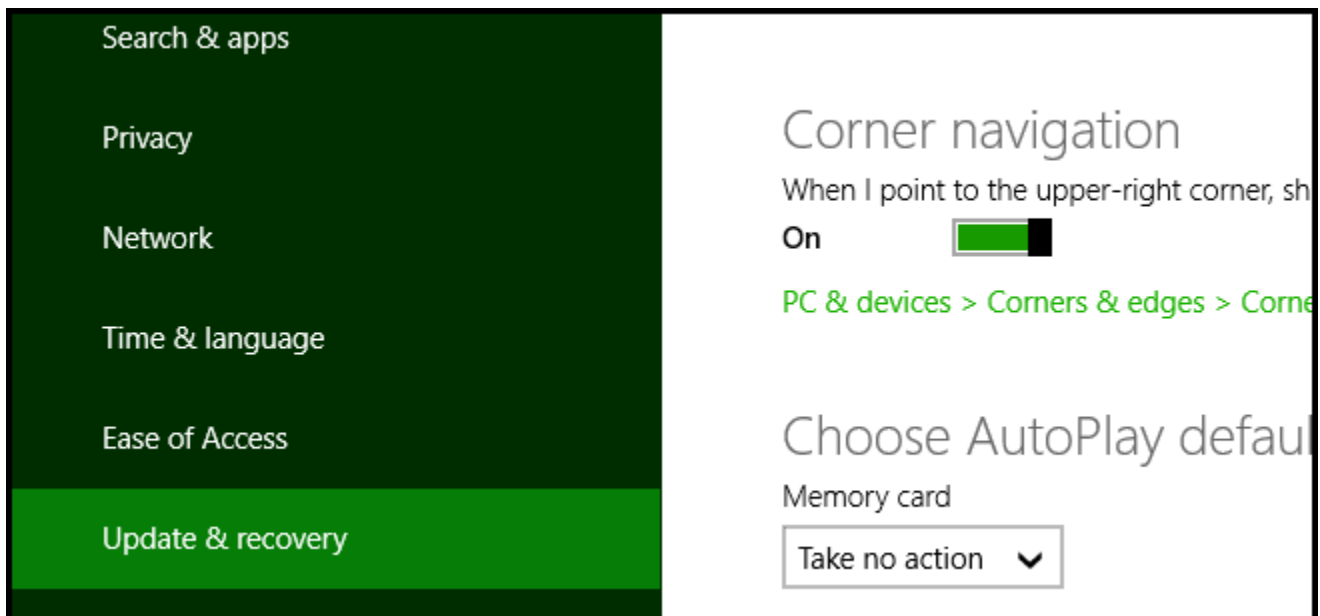

(1) Hold down the "Windows key" and press the "C" key to bring up the Charms Bar, then click on the Settings Charm:

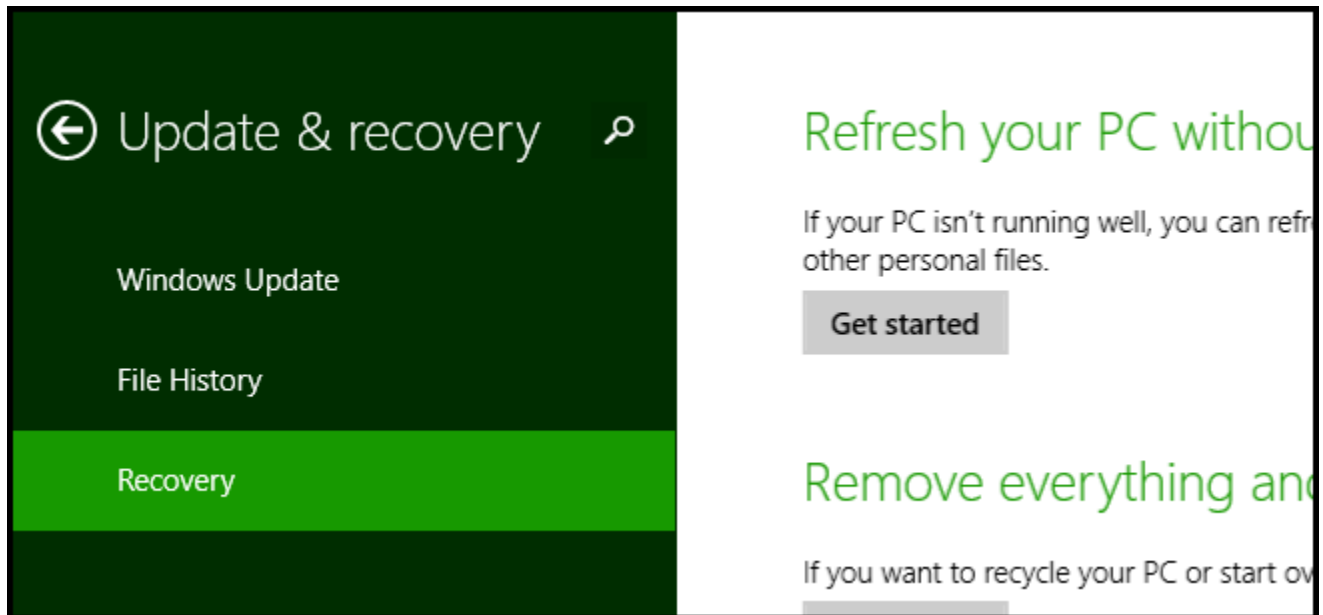

(2) Select "Change PC Settings" at the bottom of the settings bar:

(3) When the Control Panel opens, switch over to the "Update & recovery" section:

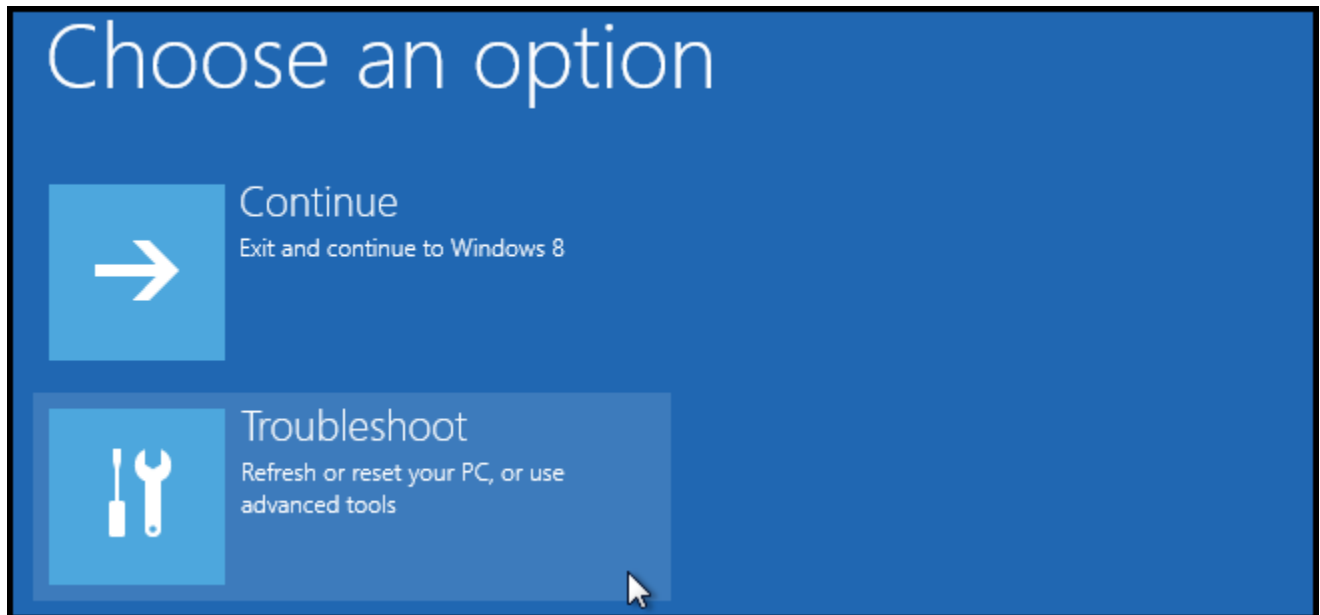

(4) Then click on the Recovery option on the left hand side:

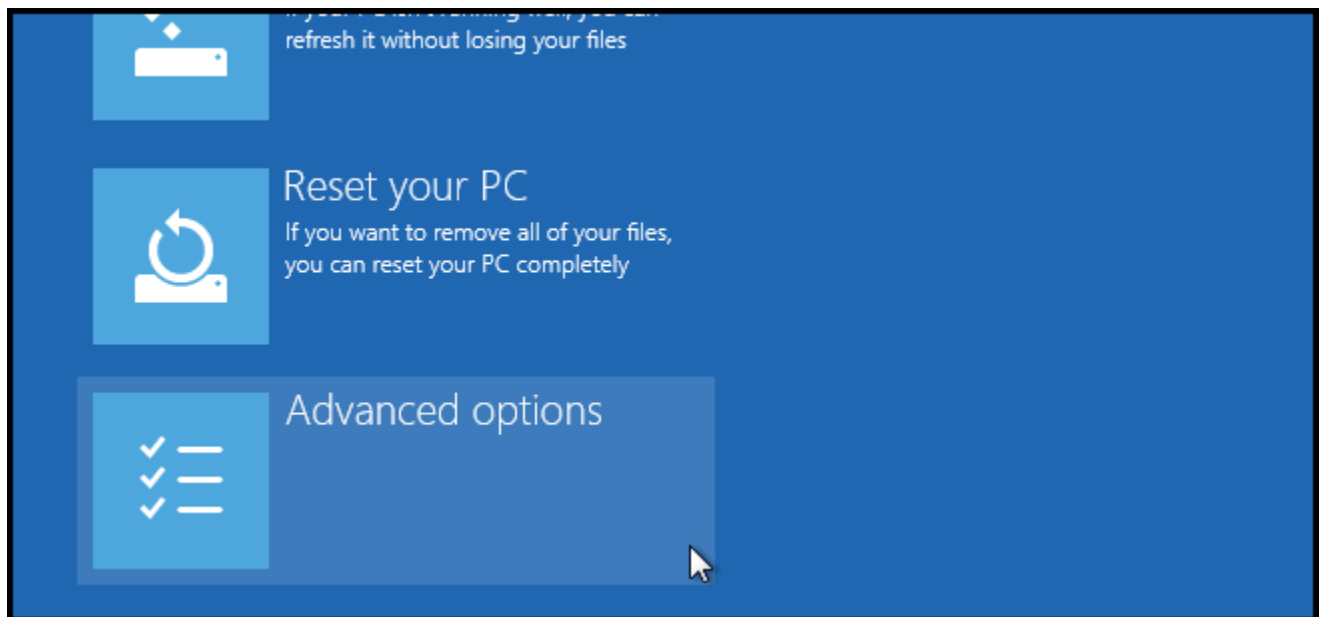

(5) Once selected, you will see an advanced startup section appear on the right hand side. You will need to click on the "Restart now" button:

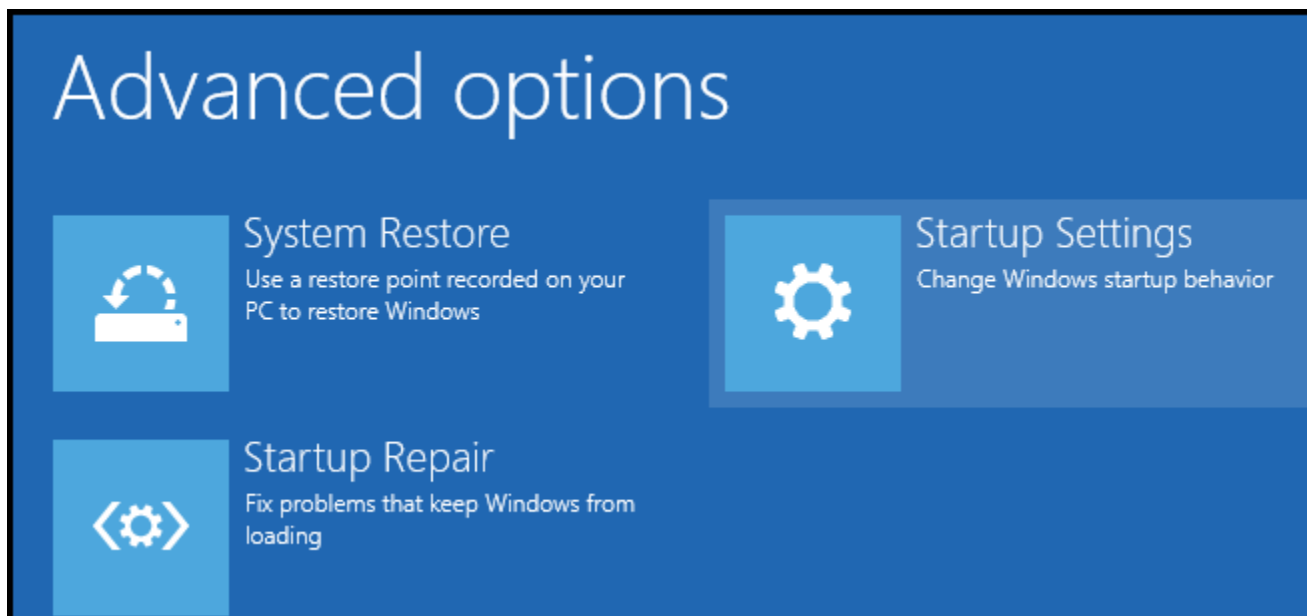

(6) Once your computer has rebooted you will need to choose the troubleshoot option:

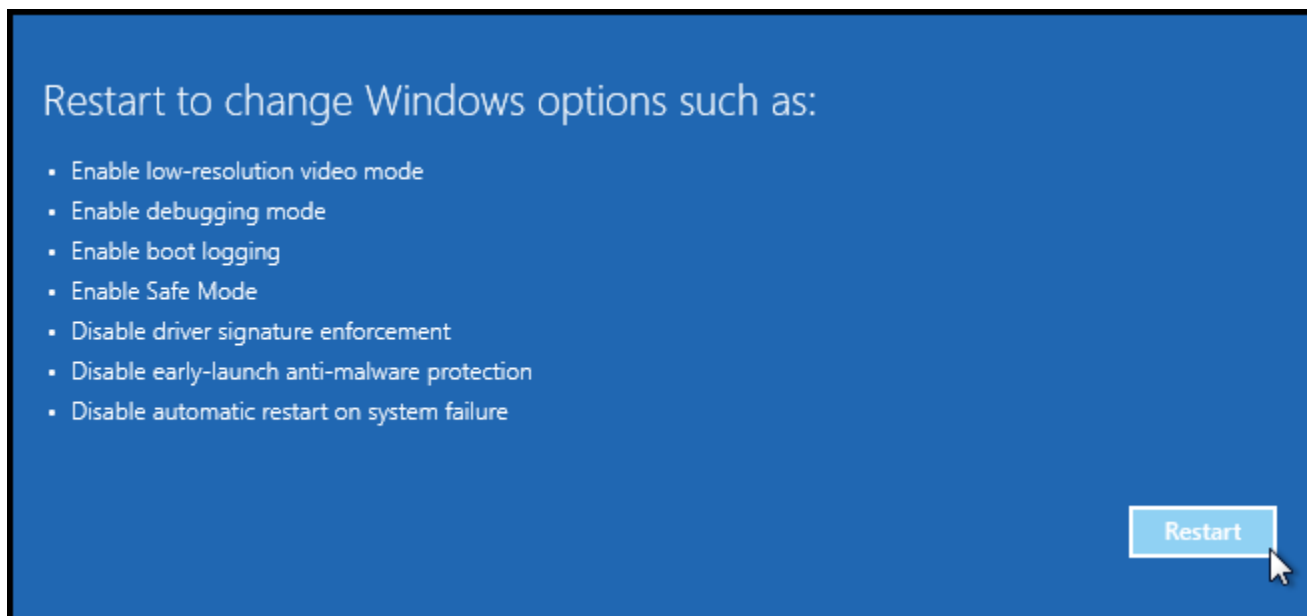

(7) Click on Advanced Options:

(8) Click Startup Settings:

(9) Click Restart again (in order to reach next option screen):

(10) Press F7 to continue booting to Windows 8 with digital signature enforcement disabled, then proceed to "Part 2" next.

# Startup Settings

Press a number to choose from the options below:

Use number keys or functions keys F1-F9.

- 1) Enable debugging
- 2) Enable boot logging
- 3) Enable low-resolution video
- 4) Enable Safe Mode
- 5) Enable Safe Mode with Networking
- 6) Enable Safe Mode with Command Prompt
- 7) Disable driver signature enforcement
- 8) Disable early launch anti-malware protection
- 9) Disable automatic restart after failure

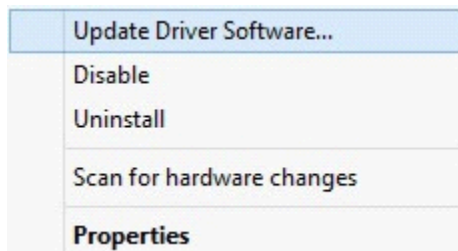

## Part 2: To manually install the unsigned driver

(1) Please properly connect the cable (6 o'clock position) to your SG3/SG4, plug the SG3/SG4 SkyCaddie to your computer, and ensure the SG3/SG4 is turned on.

(2) Hold down the "Windows key" and press the "X" key to launch the Windows 8 "Quick Link" Menu and click Device Manager:

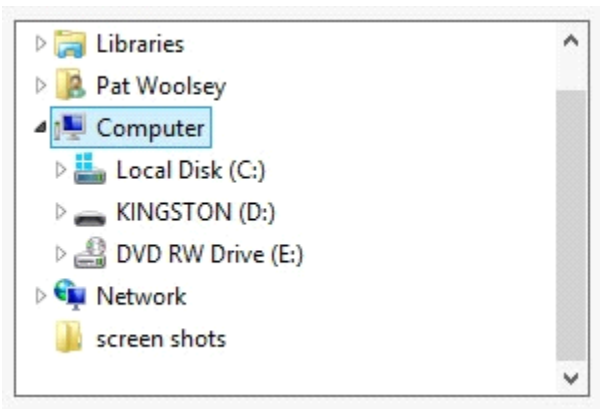

(3) Under Other devices, right click on SkyCaddie and click Update Driver Software:

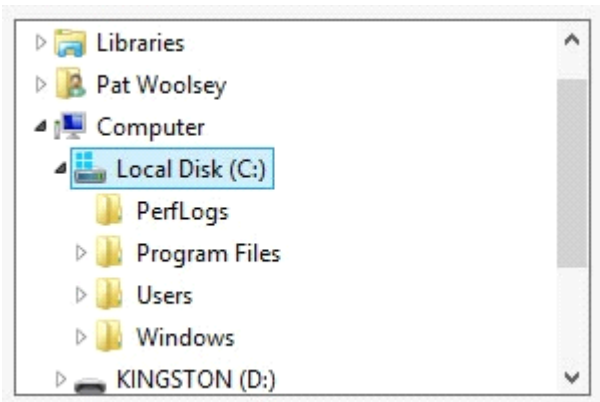

(4) Click Browse my computer for driver software and then click Browse:

(5) Click on the arrow to the left of the word Computer to reveal more options:

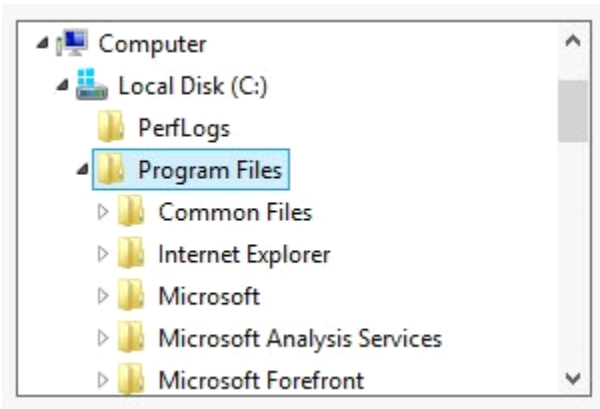

(6) Click on the arrow to the left of Local Disk C: to reveal more options:

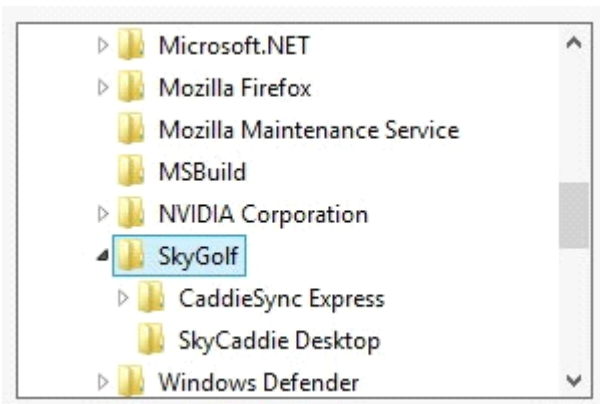

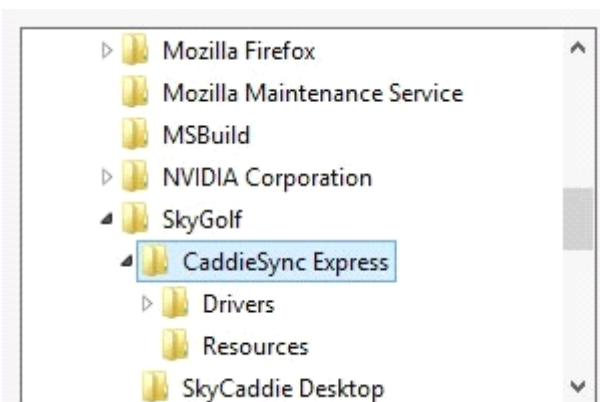

(7) Then click on the arrow to the left of Program Files (or Program Files (x86) if present) to reveal more options:

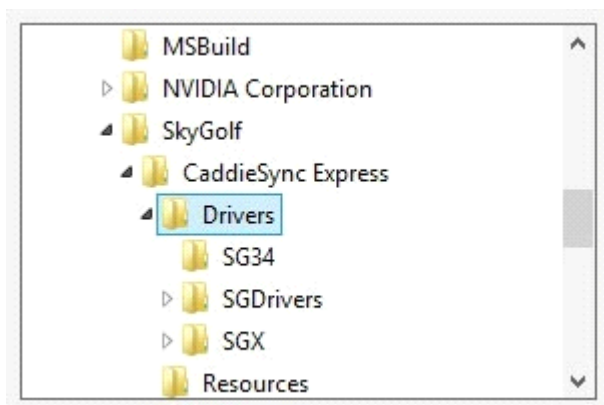

(8) Scroll down and click the arrow to the left of the SkyGolf folder to reveal more options (if you have installed CaddieSync Express, then you will have this folder):

(9) Click on the arrow to the left of the CaddieSync Express folder to reveal more options:

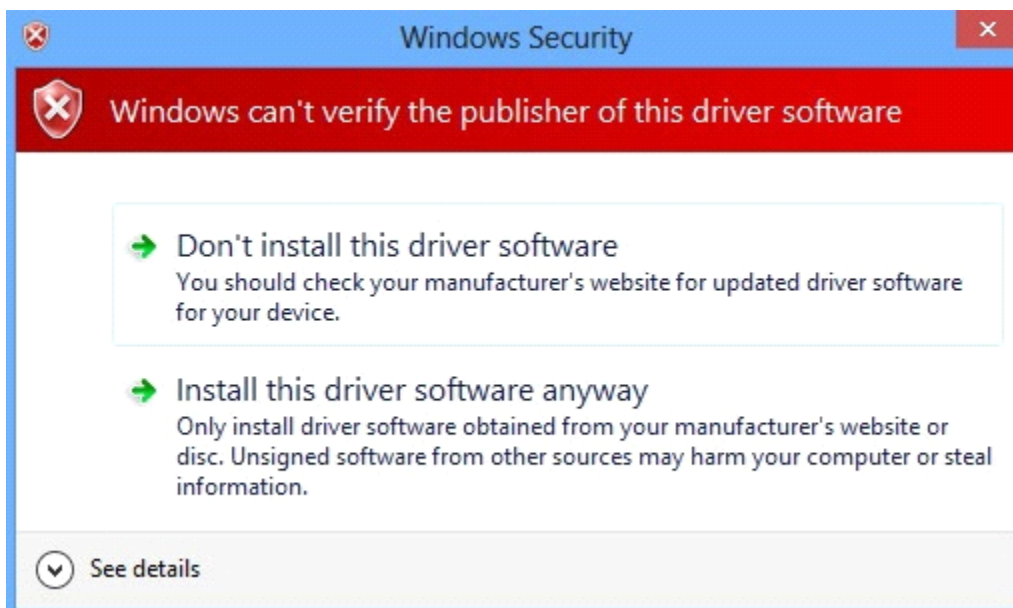

(10) Click on the Drivers folder to highlight it and click OK:

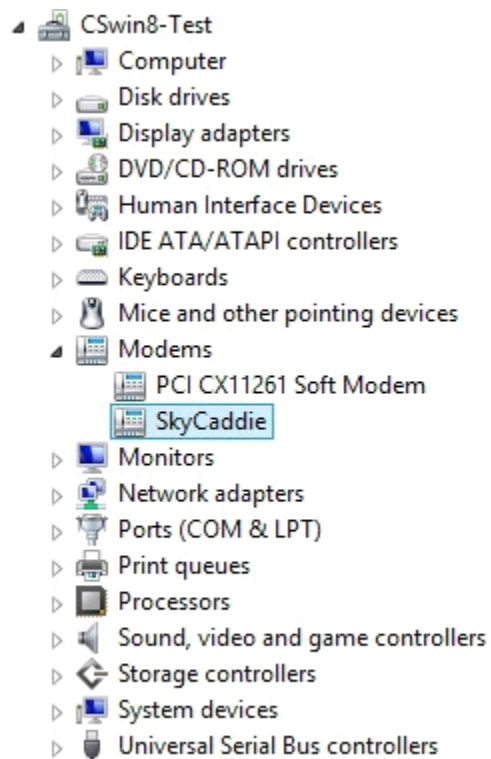

(11) Click Next.

(12) Click Install this driver software anyway:

(13) Once the driver installs, click on Close. SkyCaddie should display under Modems:

(14) To make sure the installation process was successful, please sync your SkyCaddie by using the "Sync" button in the top right hand corner of this website.

Once you've successfully installed the driver, you can restart your computer to re-enable the digital signature enforcement. If you need further assistance, please contact our Customer Support team.
